Profile

MSc Cloud Computing Student with strong **Computer Science foundations** in **Object-Oriented programming, Data Structures & Algorithms, Networking and Operating Systems**.

Hands-on experience **developing and debugging backend services**, integrating cloud-based systems, and troubleshooting complex application, networking, and infrastructure issues in Linux environments.

Delivered projects involving **asynchronous processing, monitoring pipelines, AI-powered workflows, and distributed architectures** while **applying software engineering principles** focused on **scalability, maintainability, and performance**.

Research published on IEEE Xplore. Passionate about building reliable, high-impact software products at global scale.

Technology Skills

- **Software Engineering:** Python, Object-Oriented Programming, Object-Oriented Design, Data Structures and Algorithms, REST APIs, Backend Development, Django Rest Framework, React, Asynchronous Processing
- **Cloud & Infrastructure:** AWS (Lambda, S3, DynamoDB, EC2, CloudWatch, ElasticBeanStalk, ElastiCache, SSM), Azure Fundamentals, Microservices, Kafka (Ongoing), Linux Systems
- **DevOps & Reliability:** CI/CD pipelines, Git, GitHub Actions, Automated testing, pytest, Monitoring & Logging, Troubleshooting, System Reliability
- **Databases & Caching:** PostgreSQL, MySQL, DynamoDB, relational database design, Redis, Celery
- **Core CS Concepts:** Operating Systems, Networking (TCP/IP, DNS, HTTP/HTTPS, Subnetting, CIDR), OSI Model, Scalability, Distributed Systems
- **Development Practices:** Agile Development, Debugging, Cross functional collaboration, Problem Solving, Software Design Principles
- **Certifications:**
 - Microsoft Certified: Azure Fundamentals [Link](#)
 - AWS Partner: Technical Accredited [Link](#)
 - AWS Partner: Containers on AWS (Technical) [Link](#)
 - AWS Partner: Cloud Economics Essentials [Link](#)

Work Experience

06.25-08.25| F13 Technologies | AWS Cloud Intern (Remote – Delhi)

- Designed and deployed **serverless backend microservices using Python and AWS Lambda** supporting scalable application workflows.
- Implemented **monitoring and logging using AWS CloudWatch, improving system observability and reducing time to debug runtime issues**.
- Collaborated in an **Agile team** to enhance backend service reliability through iterative fixes, testing, and deployment improvements.

06.24-08.24| Anunta - Cloud Based VDI Services | Centre of Excellence Intern (On-site – Mumbai)

- Participated in client calls and **technical discussions, gathering requirements** and assisting in cloud architecture design for **migration projects**
- Supported team in **cloud and VDI migrations** by troubleshooting **networking (DNS, TCP/IP)** and operating system-level issues, helping **minimize downtime** and service disruption
- Proactively obtained **Azure AZ-900 certification**, motivated me to fill knowledge gaps as fast as possible.

08.23-10.23| Anunta - Cloud Based VDI Services | Software Developer Intern (Remote - Chennai)

- **Debugged and resolved** application issues across **frontend, backend layers** in a cross-functional Agile environment.
- **Improved issue resolution** efficiency by tracing bugs through **logs, APIs**, and environment configs.
- Built strong software engineering fundamentals through **hands-on debugging, code reviews, and iterative development workflows**.

Academic Projects

Luna_WebBrowser_Agent | DjangoRestFramework, Celery, Redis, Whisper STT, LLMs, AWS

- Built **Django-based backend services** for assistant workflows (reminders, user management, automation) exposed via REST APIs.
- Implemented **Celery and Redis-based asynchronous processing** to improve responsiveness and enable reliable background task execution.
- Built **modular AI pipelines (Whisper + LLMs) with structured logging** across 5+ workflow stages to support monitoring, debugging, and workflow traceability.

SmartTrack Trip Planner | AWS Lambda, S3, SSM, DynamoDB, Django, REST APIs, CloudWatch

- **Built scalable RESTful backend services** integrating 4+ external APIs and AWS services.
- Implemented **error handling and logging**, reducing unresolved runtime errors by 40%
- **Resolved user-reported issues** by analysing backend behaviour and AWS service integration

RunFog Dublin (Fog & Distributed System) | Django, AWS SQS, Lambda, EventBridge

- Designed a distributed fog computing simulation **with sensor data ingestion, batching and processing** across virtual fog nodes.
- Built an **event-driven data pipeline** using AWS SQS, Lambda, and EventBridge for asynchronous telemetry processing and backend persistence.
- Developed a **Django based analytics dashboard** with real time polling, detect anomalies.

DevOps-Focused E-learning Management System | GitHub Actions, CI/CD, SonarQube, pytest

- Developed an automated **CI/CD pipelines** using GitHub Actions to streamline testing, code quality checks, and deployment workflows.
- Integrated **pytest, Django tests, and SonarQube** to detect failures early in the pipeline, resolving 50% vulnerability issues.
- **Debugged and resolved build, test, and deployment failures**, ensuring reliable application releases

Education

2025-2026 | National College of Ireland | MSc in Cloud Computing

Modules: Cloud Platform Programming, Cloud Architectures, Cloud DevOpsSec, Blockchain Concepts, Scalable Cloud Programming, Research in Computing, Fog and Edge Computing, Cloud Machine Learning, Data Governance, Compliance and Ethics, Research Project

2021-2025 | Dwarkadas Jivanlal Sanghvi College of Engineering |B.Tech in Information Technology (Minors in Data Science) | 1st Class Honours [Ronak_B.Tech Transcripts.pdf - Google Drive](#)

Participation and Achievements

- **IEEE Publication:** Published research on multilingual AI system at ICFT 2025 (IEEE Xplore), focusing on automated speech processing and structured information extraction for real-world communication workflows. [IEEEPaper_Link](#)
- **Hackathon:** Ranked Top 10 of 54 teams in a UI/UX hackathon, delivering under tight deadlines, while adapting to changing requirements.
- **Leadership:** Led 50+ team members across content, outreach, and know-how initiatives, improving digital engagement by 40% - demonstrating project management and ownership.
- **Active Leetcode problem solver and Linux system:** Solved 150+ LeetCode problems focusing on data structures, algorithms, and pattern-based problem solving to strengthen software engineering fundamentals.
